Transferable - Iqama

- An accomplishment-driven **Full Stack QA** Engineer with **7+ years of extensive experience in Test Automation** which comprises of Web/API/Mobile in the functional domain and Performance as well as Security Testing in the non-functional domain.
- Strong experience when it comes to **SDLC and STLC**
- **Agile Methodology (8+ Years)** has been the framework that I have predominantly worked on and also working on my current project where we deliver the client a working product with every sprint
- I also have good experience on writing test cases using various Test Case design Techniques like **ECP,BVA,State Transition testing** etc.
- My Work pertaining to Automation framework Development at Enterprise level encompasses of working on **POM Design Pattern with Hybrid Framework (TDD and BDD via Cucumber)** in my current project from scratch.
- Demonstrated expertise in Locating the WebElements using various Locators like **ID,Name,CSS,Class and XPath**.
- Experience also involves creation and execution of scripts in **Parallel and Sequential** using **Selenium WebDriver,TestNG,Java (7 Years)** and API Manual Testing through **POSTMAN**, API Automation using **REST-ASSURED (4 Years)**. **Appium** for Mobile Automation testing using Android Studio and Xcode (**5 Years**)
- Competent at handling Build Management Tools like **Maven** and also scheduling jobs using CI tools like **Jenkins**
- Proficient experience in **test Case Design, test Execution, Bug Tracking and Reporting**
- Have been thoroughly involved in different types of Testing's like **Smoke,Functional testing, System Integration Testing,Retesting,Regression Testing and Browser Compatibility Testing**. Performance and Load Testing via **JMeter and Gatling (4 Years)**
- Involved in **Peer reviews** to review coding standards
- Knowledge on test Management Tool **ALM**
- Good Exposure on SCM Tool **GIT HUB** and CI/CD Tool **Jenkins**
- Strong exposure with Bug Tracking tools like **JIRA** and bug Life Cycle
- Participated in **Daily Scrum Meetings** and **Weekly status meetings** with the team, developers to discuss open issues
- Analyzing **Requirement Specification Documents** and creating Test Cases based up on the requirements

Work Experience - 8.5 Years

QA Automation Engineer • UXBERT Labs

May 2020 - Present (Key Clients -> Ministry of Sports, Ministry Of Tourism, GEA, Jarir, NEOM, HalaYalla)

- Applied computer-vision visual UI testing commands to write automated visual tests - execution of RPA software on Chrome and whole section or page in one visual assertion. **Thereby, helping in producing Data for Key Analytics,boosting scalability opportunities,Aided in maintaining legacy systems with a non-disruptive approach**
- Bypassed security & advanced exploitation of vulnerabilities.
Advanced post-exploitation - **hacking other websites on the same server, dumping the database, privilege escalation etc**
- Worked Briefly as a Product Lead due to having exceptional **functional domain knowledge** and experience in Agile Framework thereby using appropriate **Decision-making protocols** and **Priority-based tools** for crucial client deliverables
- Used Apache JMeter, as a performance testing tool, to **create and execute load tests that enhance and highlight performance issues in the software under test**. Scheduled jobs using **Jenkins integration with Github and Selenium** for Multiple Test Suite execution during critical releases and key feature deployments

- Resorted to Gatling from Jmeter as it pertains to the multi message generation instead of the multi thread process that is implemented via Jmeter **thereby allowing maximum efficiency while 1000s of users can be simulated while saving CPU and RAM utilization**
- Designed UAT Document to the Ministry Of Sports and performed **complete E2E QA/QC for every release comprising of business requirements, functionalities, features (design-evaluation) deployed and test scenarios tracked for a System that has an active user-base of over 10,000 across the Kingdom**
- **Minimised the time spent by 50 % involved in manually writing and executing test cases thereby enhanced the Release Quality as well as release time between deployment on test server and PROD(LIVE). Client deliverables rate of delivery much efficient than before. Improved number of Test Cycles, Test Coverage.**
- Worked exclusively on **Automating the Mobile App (Both IOS as well as Android)** for SFA (Sports for All) platform which is established as a dynamic and proactive organization app to drive community sports in the Kingdom. Additionally, Implemented REST-Assured API Automation advanced concepts -> Chaining, JSON/XML Schema validation, Data Validation, Serialization and Deserialization to optimize STLC flow.

QA Manual/Automation Engineer • Kanoo Shipping

March 2017 - March 2020

- Responsible for conducting Manual/Automated tests for Webservices. **Reduced the testing time during Web development, Reduced cost of Web development, Shortened Server down-time thereby delivering faster Web deployment.**
- Implementing, updating & Executing automation scripts. Handling Clients call on daily basis. Developing Test Plan, Test Scenarios & test cases. Displayed **Strong analytical skills capable of assessing complex business requirements from real world scenarios and the ability to translate them into actionable target architectures, readily understood models and architectural plans.**

Quality Assurance Automation Engineer • Accenture

September 2014 - February 2017

Accenture (MNC)

Sep 2014 - Feb 2017 (2 years 6 months)

Tools: HP ALM- QTP- Selenium - Appium .

Key clients worked with:

- 1. Disney (Media and Recreation Industry)**
- 2. FirstData (Financial Domain)**

Software Testing (Manual & Automation) and Quality Assurance:

- Test Automation • Manual Testing • Quality Assurance & Control • Automation Framework design and development • Requirement Gathering • Test Case Preparation & Execution • Developing Test Plans • Test

Scripts Execution & Reporting • Technical Support • Bug Reporting • Defect Management & Tracking •

Client Coordination • Report Preparation • Was Awarded the Prestigious ACE Award for delivering High Performance and also **Accurately detecting critical issues, Enabling Reusability of Test Scripts, Reducing feedback loop between Developers and Testers.**

Education and Certifications

ISTQB-CTFL | Selenium - Web Automation - Edureka | Jmeter - Performance QA - LinkedIn | RestAssured - API Automation - LinkedIn | Appium - Mobile Automation - LinkedIn | KARATE Automation - UDEMY | Jenkins - LinkedIn | Git and GitHub - LinkedIn | Agile Project Leadership - LinkedIn | B.Tech (E.C.E.) - Anna University | ICSE Board- TVS
